Tanvir Siddiqui

Backend Developer

t.ikbal.siddiquee@gmail.com 01743673354 Dhaka, Bangladesh

Profile

Backend Developer with 3 years of experience in building scalable web applications, business workflows, and RESTful APIs using Laravel and MySQL. Skilled in standard Laravel architecture, module design, database optimization, and ERP-style business logic. Adept at transforming complex operational requirements into reliable software solutions.

Professional Experience

06/2024 – Present

Softvence Agency, *Backend Developer*

- Developed and maintained scalable back-end modules and business workflows using Laravel 11, strictly adhering to standard file structuring, design patterns, and clean architecture.
- Designed and integrated secure REST APIs for mobile and web applications with JWT authentication, validation, and role-based access control.
- Designed complex MySQL relational database schemas, managed migrations, optimized queries, and ensured data integrity for multi-tenant and role-based systems.
- Performed rigorous API testing, debugging, code reviews, and managed version control (Git/GitHub) alongside basic server deployment workflows.

Skills

Backend Technologies — PHP | Laravel 11 | REST API | Authentication (JWT) | Middleware | Validation

Database — MySQL | Eloquent ORM | Query Builder | Migration & Seeding | Relationships

Frontend Basics — Blade | HTML5 | CSS3 | JavaScript (ES6+) | AJAX | DataTables

Tools — Git | GitHub | Composer

Others — Problem Solving | Teamwork | Collaboration

Projects

The Pilot Network

- Built a searchable platform where users can find and compare flight schools.
- Added school profiles showing details, courses, and contact information.
- Implemented review & rating system for students to share feedback.
- Added user login & registration for submitting reviews.
- Created Admin Dashboard to manage flight schools, articles, advices, courses, users, and reviews.

Mentis – GCSE Maths Learning Platform

- Developed an interactive GCSE Maths learning platform inspired by Tailored Tutors, focused on structured lessons and student engagement.
- Built a lesson-based system with video tutorials, quizzes, and a comment section for student interaction and doubt solving.
- Implemented student dashboard features, including timetable builder, reminders, topic search, and exam practice packs.
- Integrated live learning options such as 1:1 session booking and weekly livestream classes.

- Created a complete flow with a landing page, free trial access, and a subscription-based payment system.

Jobdockets - Freelance Rate Calculator Website
- Built a one-page responsive web app with USD-Naira live converter (API-based), freelance pricing by experience, and a downloadable invoice generator.
- Added backend features to manage courses and job listings for freelancers.

Property Bidding- Real Estate Investment Platform
- Developed a real estate investment platform enabling multiple investors to collectively fund property projects by contributing different investment amounts toward a shared funding target.
- Implemented a wallet-based investment system, allowing users to add funds subject to admin approval and invest their available balance in property projects.
- Built separate user and admin dashboards for managing investments, tracking funding progress, monitoring transactions, and administering properties, users, and fund deposit approvals.

Auto Repair Service Platform
- Developed a mobile-friendly auto repair website to help customers explore services, browse tire options, and book appointments online.
- Built frontend interfaces using React and integrated Laravel REST APIs with a MySQL database for dynamic website functionality.
- Implemented service management, appointment booking, tire listings, and backend features to improve customer experience and streamline shop operations.

Self-Employment Checker - Eligibility Assessment Website
- Developed a responsive website to help users determine their eligibility for self-employment through a customized questionnaire.
- Implemented user registration, self-employment calculation logic, instant result feedback, and downloadable assessment summaries.
- Integrated Dutch language support and an admin panel for content management, ensuring an accessible experience across desktop, tablet, and mobile devices.

Education

2016 – 2021 Cumilla, Bangladesh
Bsc in CSE, *Bangladesh Army International University Of Science & Technologoy*

2014 – 2016 Cumilla, Bangladesh
Higher Secondary School Certificate, *Ibn Taimiya School & College*
